QUALIFICATION AND PROJECT DETAILS

Programme Title	OCC: SOFTWARE ENGINEER
Module Title	Software design and testing C#
Module Code	SDT621
NQF Level	6
Assessment Type	WEEK 1 INDUSTRIAL PROJECT
Hand Out Date	17 / 0 4 / 2026
Project Developer	Lusukama Selemani
Submission code via	Github

Student Name and Surname	Tiaan Gerber
Student Number	20240879

In line with industry requirements, CTU Training Solutions (PTY) Ltd is fully accredited by the MICT SETA (ACC/2006/07/186) through the Quality Council for Trades and Occupations (QCTO). CTU Training Solutions is registered with the Department of Higher Education and Training as a Private College (2018/FE07/004) and provisionally registered as a private higher education institution (No 2014/HE07/004). **Directors: R Meeske, N Tattersall, E Ferreira, B Brown | Co. Reg No:2005/038944/07**

Instructions:

Please read the following instructions carefully before attempting this project assessment.

General Instructions

- Read the full project scenario and all tasks carefully before starting your work.
- Pay attention to the requirements for each section of the project.
- Ensure that you answer all required tasks in both the Console Application and the Windows Forms Application components.
- Apply the C# programming concepts covered in Week 1, including:
  - variables and data types
  - identifiers and keywords
  - operators and expressions
  - methods
  - scope (global and local variables)
  - type casting
  - user input and output
  - basic Windows Forms interface design
- Use meaningful variable names and proper coding conventions.
- Ensure your program produces clear and well-formatted output.
- Test your application before submission to confirm that it runs correctly without errors.

GitHub Submission Requirement

You are required to:

- Push your project code to GitHub
- Ensure the repository contains the correct and complete solution
- Share the GitHub repository link in your submission for review and verification
- Example: https://github.com/your-username/project-name

Make sure your repository:

- builds successfully
- contains all project files
- matches the work submitted in your ZIP file

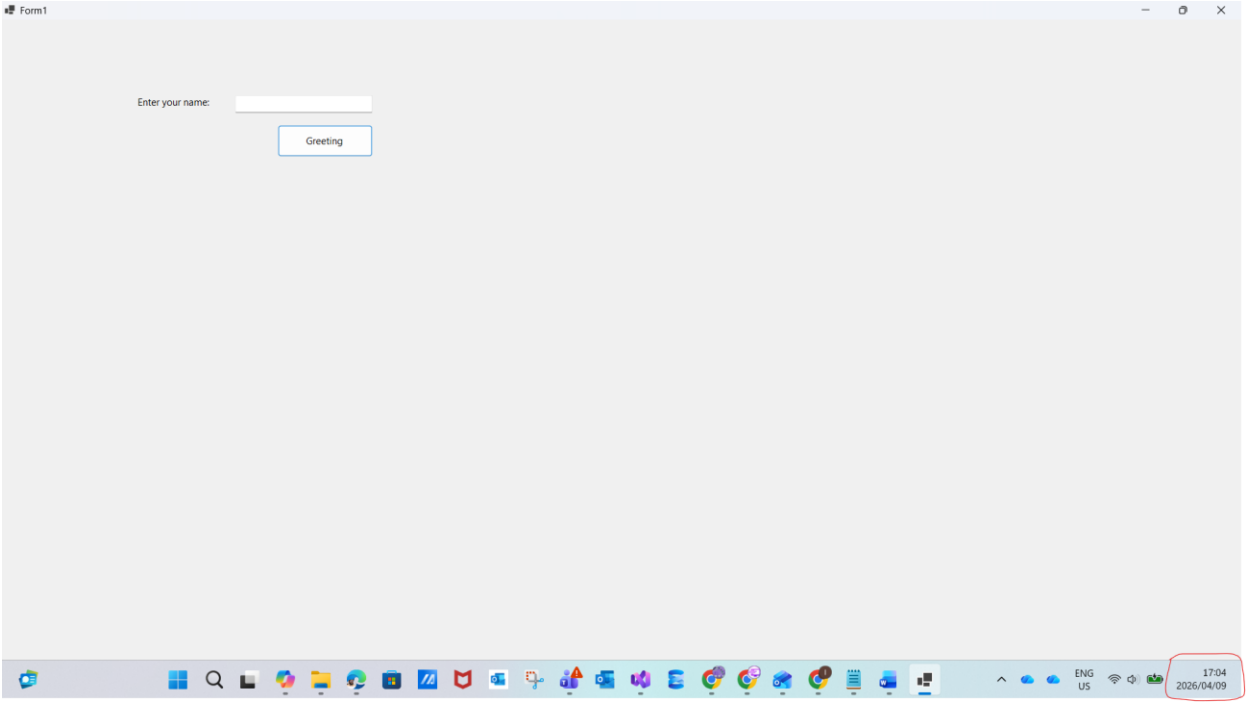
In line with industry requirements, CTU Training Solutions (PTY) Ltd is fully accredited by the MICT SETA (ACC/2006/07/186) through the Quality Council for Trades and Occupations (QCTO). CTU Training Solutions is registered with the Department of Higher Education and Training as a Private College (2018/FE07/004) and provisionally registered as a private higher education institution (No 2014/HE07/004). **Directors: R Meeske, N Tattersall, E Ferreira, B Brown | Co. Reg No:2005/038944/07**

Learning Outcomes:

- Structure of C# program
- Variables & data types
- Identifiers & keywords
- Arithmetic operators
- Expressions
- Methods
- Method parameters
- Scope (global/local)
- Type casting
- Increment / decrement
- Console input/output
- Windows Forms interface basics

Example of Collecting Evidence for your submission pdf:

Question1 :



Ensure each screenshot shows the **full screen**, including the **system date and time**

Smart Student Profile Processor (Console + Windows Forms Starter Version)

Project Overview

You are required to develop a C# project-based solution based on the Week 1 content covered in class. This task is designed to simulate a real workplace activity where a junior developer is asked to build a simple student information processing system.

The project must demonstrate your understanding of the following Week 1 concepts: creating a basic C# program, using Visual Studio, variables, data types, operators, methods, scope, and basic Windows Forms development. These topics are part of the Week 1 outcomes in the provided slide content.

Project Purpose

You are hired as a Junior Software Developer at Kitumaini Digital Solutions.

The company is building a Student Readiness Capture System used by training providers to:

- capture student information
- validate data
- calculate readiness indicators
- display structured outputs
- prepare data for future database storage

Your responsibility this week:

Develop Version 1 (Console Application + Basic Windows Form) of the system.

Key Focus Areas

Your submission will be evaluated based on:

- correct program structure
- correct use of variables and data types
- correct use of operators
- correct use of methods
- implementation of method overloading
- correct scope usage
- input validation
- Windows Forms interface functionality
- program output formatting

In line with industry requirements, CTU Training Solutions (PTY) Ltd is fully accredited by the MICT SETA (ACC/2006/07/186) through the Quality Council for Trades and Occupations (QCTO). CTU Training Solutions is registered with the Department of Higher Education and Training as a Private College (2018/FE07/004) and provisionally registered as a private higher education institution (No 2014/HE07/004). **Directors: R Meeske, N Tattersall, E Ferreira, B Brown | Co. Reg No:2005/038944/07**
